

BUILDING **TOWARDS** **THE FUTURE**

An innovative company with a proud history in Canadian communications, Rogers Business Solutions leverages an extensive coast to coast network to provide enhanced enterprise communications services and has aggressive plans to expand interconnection opportunities beyond Canadian borders.

As leaders in innovation, Rogers is providing IP-enabled, high bandwidth data connectivity leveraging extensive cable assets. What this means to our customers is the ability to replace legacy data networks with fully IP-enabled data connectivity. Our focus is on the targeted expansion of our advanced network and the incorporation of emerging technologies designed to meet the future needs of your business.

With a vast national network utilizing strategic points in the U.S., Rogers is uniquely positioned to offer a true alternative to traditional communications providers by offering cost-effective, high bandwidth multi-site network solutions with inherent route diversity and quality of service assurance.

We deliver in the areas that matter most to your business:

- National reach through a coast to coast network
- Multi-site branch connectivity
- Inherent route diversity
- Quality of service assurance
- Client Multicasting and Video delivery initiatives
- The most secure, reliable high speed network

Discover what a growing number of Canadian businesses already know – Rogers is the true alternative network.

COME TALK TO US.

Rogers' innovative Layer3 network has led us to one of the most robust, scalable, redundant core infrastructures in the telecommunications industry. This has enabled Rogers to provide an advanced MPLS offering. This includes various features that leverage clients' applications to provide advantages to businesses and their client communications.

Rogers has firmly established itself in the Financial Services market, offering reliable branch connectivity that is essential to our clients. Rogers consistently provides the security, dependability and quality of service that this market demands. Our expertise in implementing multi-site networks is one of our greatest strengths – building networks is what we do.

Rogers recently replaced one of the largest legacy data pack networks in Canada, leveraging our extensive cable infrastructure to provide fully IP-enabled data connectivity. Our high bandwidth solution has delivered a reliable, cost-effective and scalable network, resulting in increased efficiencies and business productivity. At Rogers, we specialize in large-scale network upgrades.

Rogers is recognized as an authority in enterprise communications services for provincial and federal government agencies. Our knowledge in network design and support infrastructure has delivered financial benefits, operational flexibility, and opportunities for innovation to a rapidly growing number of government funded agencies and enterprises.
