

Your Lights Your Savings Your Community Our Expertise

ERTH's Complete Turn-Key LED Street Light Upgrade Program

Program

ERTH's complete, turn-key LED street light upgrade program is a proven solution already helping many municipalities save energy costs. As a company owned by eight municipalities, we understand the pressure put on municipalities to continuously find new ways to cut expenses. LED street lights use less than 50% of the energy used by existing high pressure sodium lights. Through our program, the municipality is guaranteed payback on their investment strictly through savings prior to the expiration of the warranty significantly reducing risk. Other highlights include:

- Large savings on your street light electricity bill (over 50%)
- Complete design/analysis
- Complete set of photometrics
- Brighter and cleaner street light illumination
- Project management/administration and installation
- Our street light software program
- Full line of street light fixtures to choose from
- 10 year warranty on street light fixtures (rated for 100,000 hours) and photocells
- Pay back prior to warranty expiration
- Reduced street light pollution
- One stop LED upgrade including financing at municipal rates
- Data collection and reporting
- Rewiring of existing street light where applicable

Experience

ERTH is the most experienced LED conversion company in Ontario. In fact, we are so confident in our process that we will provide your community a test plot to show you the savings and benefits prior to making your decision to invest. In addition, our team at ERTH are "design experts". With more than 30 years experience in street light design, you can trust that ERTH knows what it takes to handle every street and road layout.

Municipalities have chosen time and time again that ERTH is the best choice for completing their LED street light upgrade. So far we have partnered with over 60 municipalities in Ontario.

Don't just take our word for it. We're happy to provide references and testimonials. For example, Dan Belleau, Director of Public Works for the Township of North Dundas said the following:

"After extensively reviewing the marketplace, partnering with ERTH proved to be the best choice, based on their experience and ability to deliver a complete turn-key solution."

Product

At ERTH, we take great pride in offering municipalities choice when it comes to their LED lighting. Rather than having one exclusive supplier, we have relationships with multiple leading LED street light manufacturers, including Philips, Leotek, Autobahn, and GE. This provides you choice as to quality, durability, and price. We will work with you to ensure all of your street lighting needs and wants are satisfied.

Administration

ERTH provides customers expert project management/administration as well as installation. As part of our program, we will assist your municipality with:

- Applicable incentive funding application
- Street light conversion (weekly) to LDC, software
- Recycle program
- Final applicable incentive funding application/LDC results
- Asset management with street light inventory
- Complete design and photometrics
