Who Will Benefit from this Webinar? IT Staff, Engineering, Transportation, Facilities, Utilities, Economic Development, Network Operations, CAOs and Mayors

Registration Cost FREE but registration is required (see link below)

When it comes to helping communities continue in their efforts to become smarter, city size shouldn't be a burden in terms of having access to technology that can support them. In fact, smaller cities may have advantages they can leverage to get things done more efficiently and may see a larger benefit in terms of reducing expenses and improving their communities and quality of life for their citizens.

In this webinar, eleven-x CEO & President Dan Mathers will take a look at some key variables that can help cities, of any size, leverage technology to provide the best programs and services including;

- The importance of scalability, not size
- Fostering a culture of innovation
- Technology and choosing the right solutions
- Collaboration and solutions that bring communities and organizations together

Dan will draw on field-proven use cases, and how cities can use innovative technologies to power a wide range of solutions under a single, multi-use network.

Contact Katherine Wadington, Digital Content Marketer at katherine.waddington@eleven-x.com if you have any questions about this opportunity.

About the speaker

Dan Mathers
CEO & President, eleven-x

As President and CEO of eleven-x, Dan is leading one of North America's leading full-service low power IoT solution providers and operator of Canada's first and only coast-to-coast public low power network optimized for the Internet of Things. eleven-x offers complete IoT solutions that facilitate faster, evidence-driven decisions through wireless connectivity and real-time data collection for smart cities, campuses, buildings and industry.

About eleven-x

eleven-x helps cities leverage opportunities with complete, wireless solutions that enable accurate, remote monitoring and can scale up from pilot to full roll out, delivering real ROI each step of the way. eleven-x has delivered solutions ranging from smart parking to indoor air quality monitoring to water management (from source to wastewater and leak detection) for cities across Canada and the United States. Offering complete device-to-cloud LoRaWAN® solutions, eleven-x enables smart cities and municipalities to take advantage of remote monitoring and management of their assets and infrastructure, enabling the delivery of better programs while reducing operational costs.
