

Forward-thinking Risk Solutions for the Public Sector

Aon is the world's largest insurance broker offering risk solutions to municipalities within the public sector. Our goal is to provide you with the information necessary in order to make informed business decisions and ensure that all your needs are met through a custom insurance policy.

Providing you with knowledge and insight

Aon's Public Sector Practice will analyze your risk control portfolio to provide you with the following knowledge and insight:

- Policy audits – to determine if there are any gaps in your current program and ensure that you have the most up-to-date enhancements available in the market place for each line of coverage.
- Benchmarking – comparing limits, retentions, and premium levels to determine if you're carrying sufficient limits and coverage.
- Retention studies – to better understand your risk appetite to ensure that your current program is carrying appropriate deductible options to reflect your risk philosophy.
- Alternative risk study – a thorough analysis of your current insurance program and its exposure to loss. This will determine the correct amount of premium your organization should be paying and taking the mystery out of predicting insurance costs from year to year.
- Regulation/legislation advisory – Aon will advise you of any regulatory or legislative changes via our Legal and Research Practice.
- Industry trends – by combining our significant experience in the industry with proprietary tools, such as the Canadian Insurance Market Report, we can provide insight into the constantly evolving trends and challenges unique to your business.
- Contract reviews – to determine insurance obligations and the effect they have on limits and deductibles.
- Market security – we monitor and review the financial health of insurers sourced by Aon.

Changes in status are communicated in real time through the account team.

- Manuscript policy wordings – we prepare and deliver bespoke policy wordings.
