“Although we live in an information technology age, we often find ourselves in failure to communicate situations.” Johnny Tan

There is no doubt that successful communication is imperative for those who are in management and administration roles in municipal government. The communication challenge may be to make a meeting of council members more effective and efficient when you have some joining remotely. The challenge may be to stream a council meeting to the public to add transparency and encourage engagement from constituents.

In this third webinar from DataVisual we look at tools that can help municipal administrators achieve these goals.

We will hear Epiphan detail the keys to a successful live streaming program of your council meeting. [Council Live Stream](#)

And Televic will introduce a new communication platform built specifically for the municipal market and the need for a Hybrid Remote meeting solution [Confero Meet](#).

Please join us on June 22nd at 1:00 p.m. EST to hear these valuable presentations on tools to assist you to Connect and Communicate and join in on the Q&A that follows these presentations.

Contact Dwaine Ruf at DataVisual druf@datavisual.ca if you have any questions about this opportunity.
