

RENT VS. OWN

# Rent any equipment. Own every project.

Get the right equipment, when and where you need it. United Rentals gives you access to over 4,000 classes of construction equipment – expertly maintained and ready to get to work.

No wasting time searching, either. Our rental experts work with commercial and industrial customers every day. So even if you don't know the exact lift or loader you need, we will. And we'll deliver it to your jobsite. Or you can pick it up. With over 1,100 locations across North America, odds are we're near your business or project.

## Feel confident with rent ready equipment.

Before any equipment gets to you, it goes through our nuts-to-bolts checklist to ensure it meets OEM standards. Because to us, rent ready means job ready. Here's how we continue to stand by our equipment once it goes to work for you:

- Onsite maintenance, day or night
- Onsite service and emergency repairs
- Equipment relocation from site to site
- Equipment replacement sent to site when needed

## Renters are building a stronger bottom line.

Save money, time and labor with rental equipment. Purchasing equipment is a commitment that diverts capital while adding costs for upkeep and management. But renting can lead to lowered expenses, less maintenance and less paperwork. Take advantage of all the benefits renting offers, including:

- No depreciation or risk of obsolescence
- No maintenance or repair fees
- No insurance, taxes, licensing or storage yard costs
- Access to a diverse fleet – so you get exactly what you need
- Pay for only the equipment you need, when you need it
- Rent for only the period you need – a day, week or year
